

# CASE STUDY

## ACHIEVING A HIGH PERFORMANCE LIGHTING SYSTEM

Sparkfund performed an LED lighting upgrade at a Distribution Center location in the Dallas Ft. Worth metro area. The scope included **upgrading a total of 1,127 fixtures with high efficiency LEDs**, including the addition of **110 new fixtures** in an open storage area which generated immediate energy savings as well as more uniform lighting quality at the facility. The proposed upgrades delivered **annual energy savings of 784,888 kWh** resulting in **713,856 lbs. of CO2e emissions saved**.

Cash Price	Rebate	Annual Energy Savings	Annual Maintenance Savings	Monthly As-a-Service Cost (120 months)	Monthly AAS Net Savings
\$477,661.41	\$68,232.00	\$49,447.96	\$23,773.48	\$5,130.95	\$971

Sparkfund has worked on multiple distribution and retail centers for this customer, spanning LED lighting, HVAC controls and replacements, and submetering.
